3. The quickest search method is to simply use the default options and enter one or more keys words you want to search on in the **"Search for:"** field, i.e. "poo" or "nail clipping". However if you want to run a more specific search you can enter your key words then un-tick forum boards you don't want to look in. You can also search just **"Subject"** or **"Message"** text by ticking \ un-ticking the **"Search In:"** options accordingly. You can increase or decrease the number of results returned by setting the **"Maximum results:"** option, default is 10. And you can change the way in which the search results are displayed by changing the **"View results as:"** option. Once you've set your search up click on the **"Search"** button and review the results returned. **This completes this guide we hope you found what you were looking for.**
